

1) Check Positive number

- Flowchart

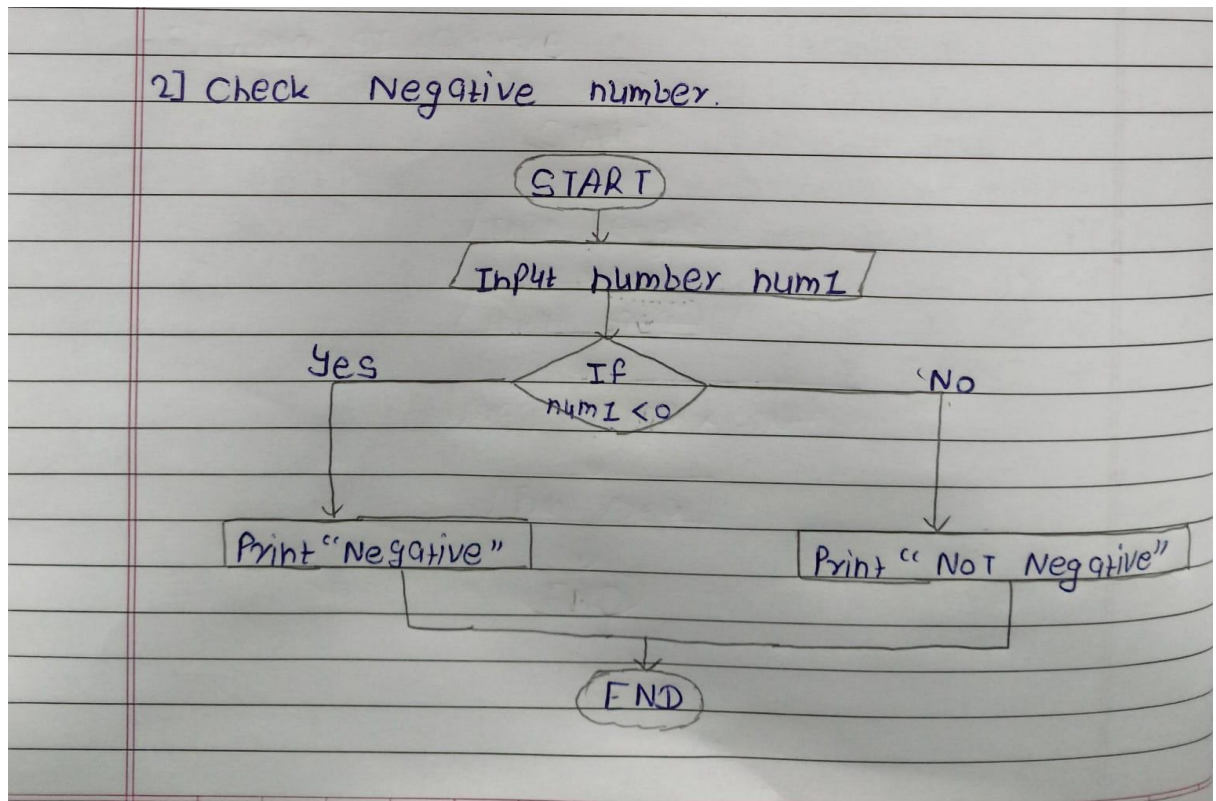

- Code: -

```
public class positive{  
    public static void main(String[] args){  
        int num1 = 5;  
        if(num1 > 0){  
            System.out.print("The number is positive");  
        }else{  
            System.out.println("The number is not positive");  
        }  
    }  
}
```

2) Check Negative number

- Flowchart

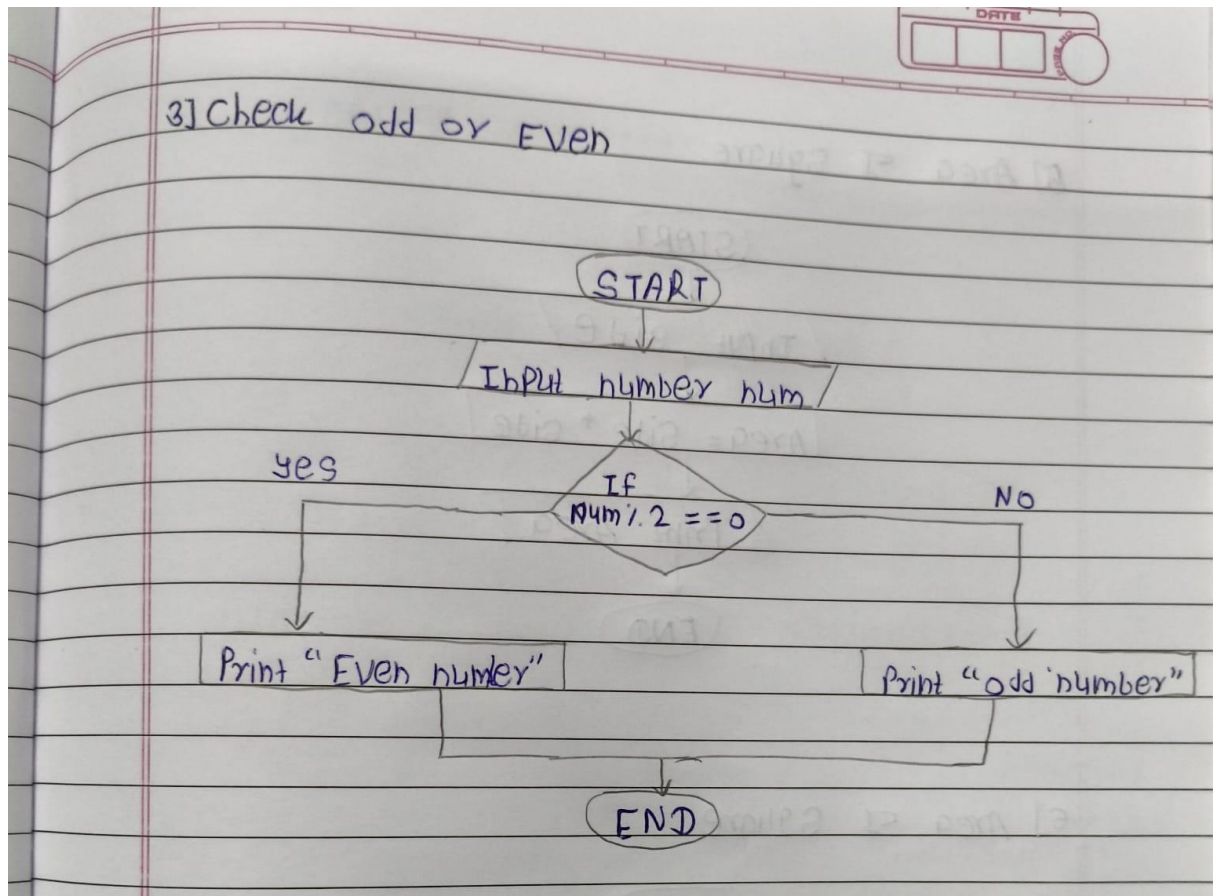

- Code: -

```
public class negative{
    public static void main(String[] args){
        int num1 = -5;
        if(num1 < 0){
            System.out.print("The number is negative");
        }else{
            System.out.print("The number is not negative")
        }
    }
}
```

3) Check Even or Odd

- Flowchart

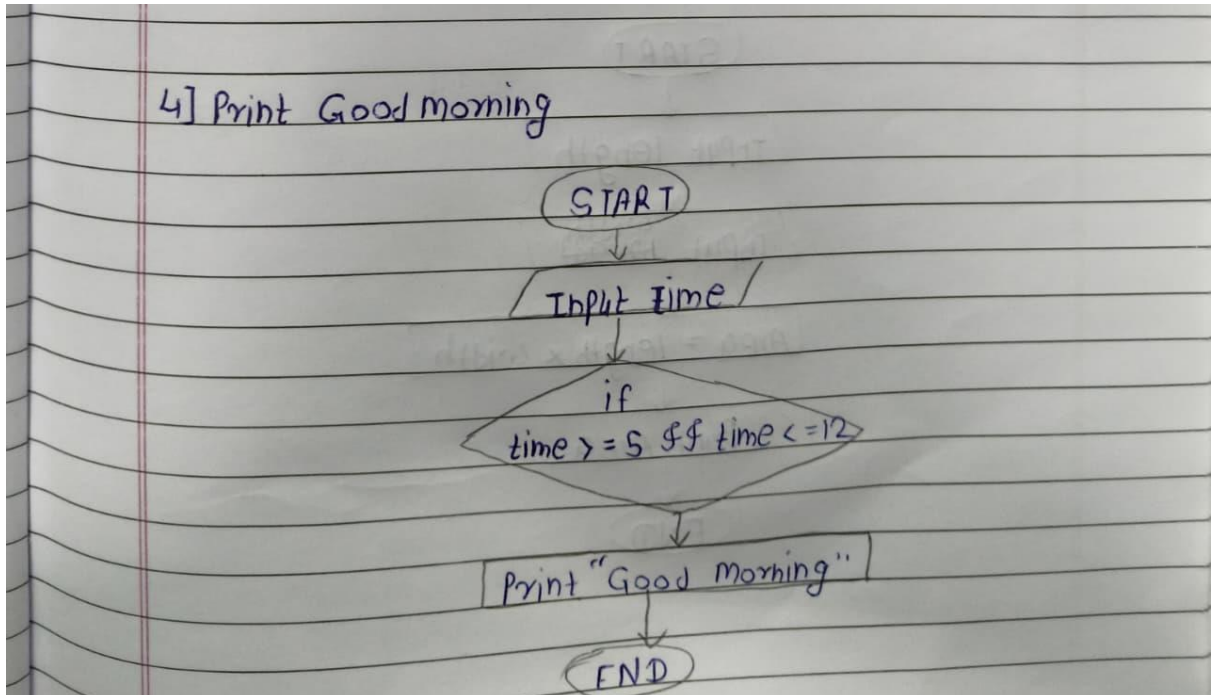

- Code: -

```
public class checkEvenOdd{  
    public static void main(String args[]){  
        int num = 10;  
        if(num % 2 == 0){  
            System.out.println("The number is even");  
        }else{  
            System.out.println("The number is odd");  
        }  
    }  
}
```

4) Display Good morning

- Flowchart

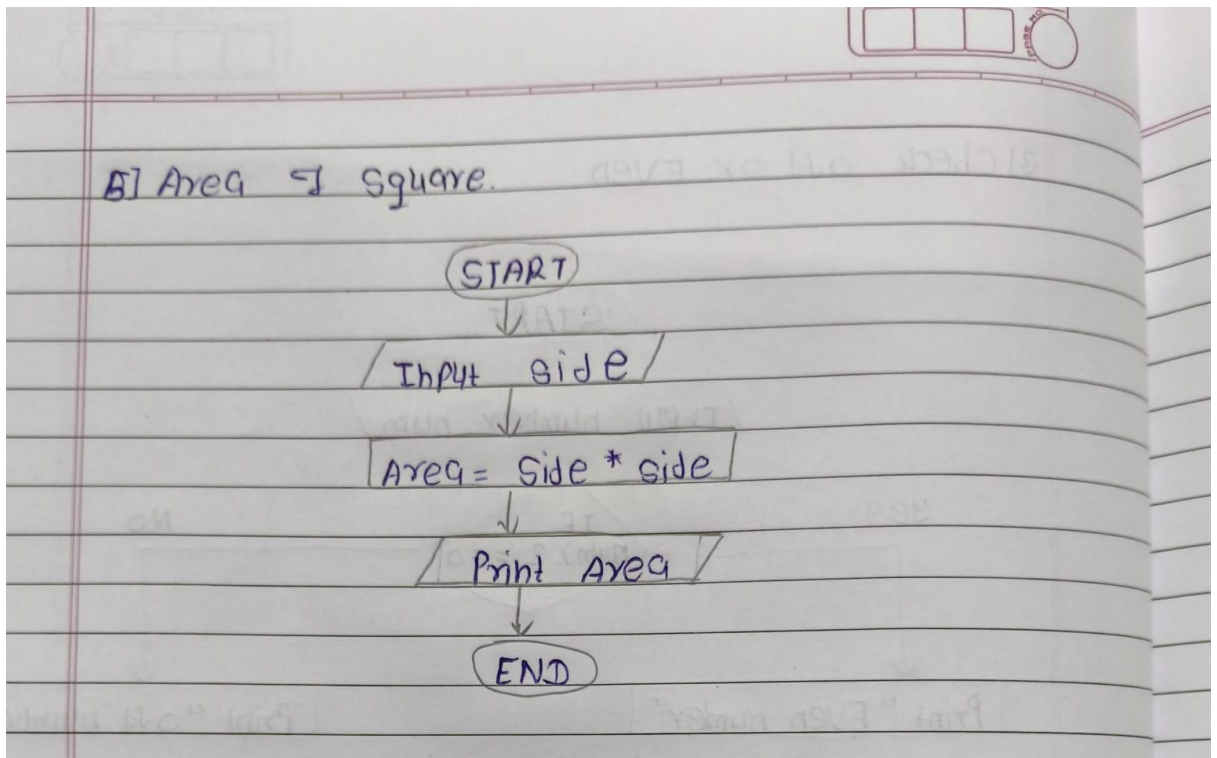

- Code: -

```
public class GoodMorning{
    public static void main(String[] args){
        int time = 6;
        if(time >= 5 && time <= 12){
            System.out.println("Good Morning");
        }
    }
}
```

5) Print Area of Square

- Flowchart

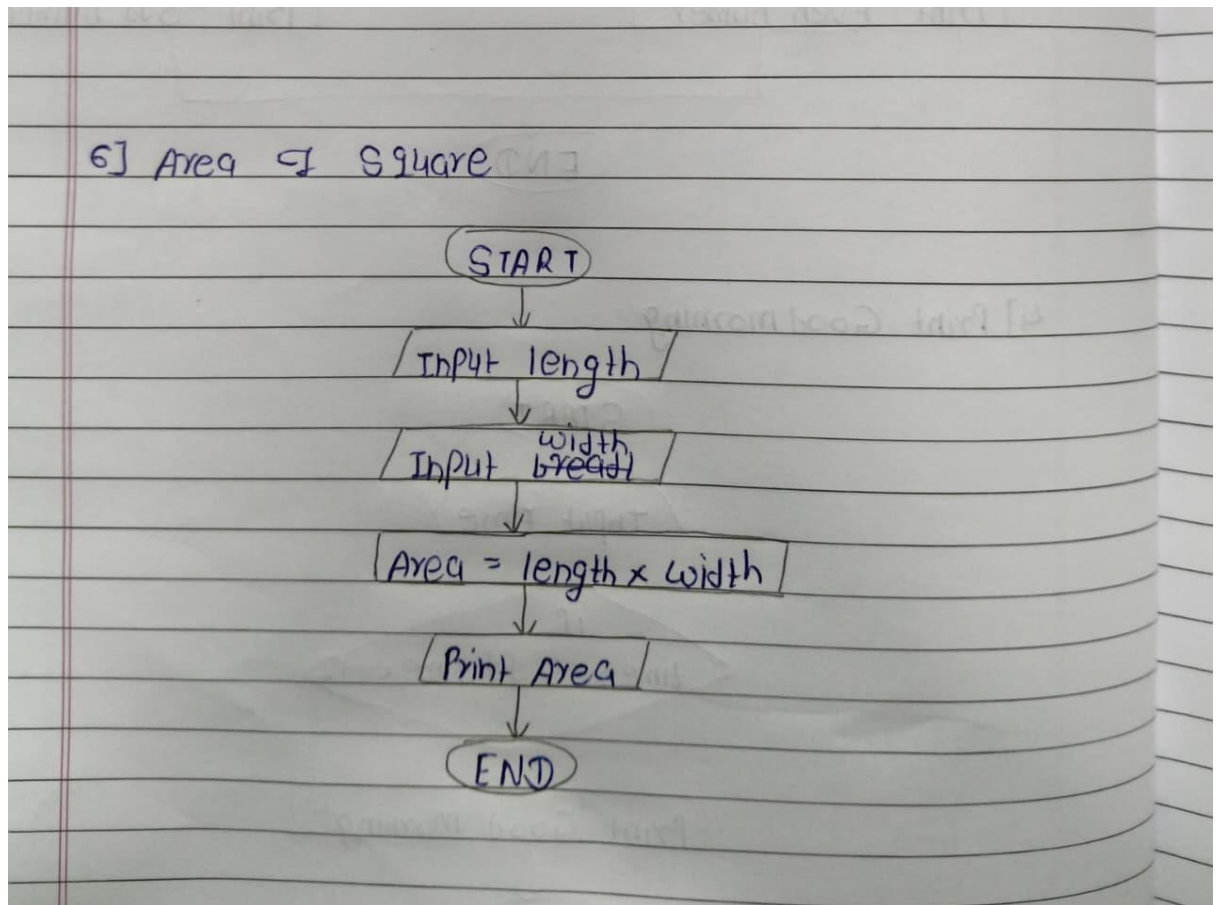

- Code: -

```
public class AreaofSquare{  
    public static void main(String[] args){  
        int side = 5;  
        int area = side * side;  
        System.out.println("The area of square is:"+area);  
    }  
}
```

6) Print Area of Rectangle

- Flowchart

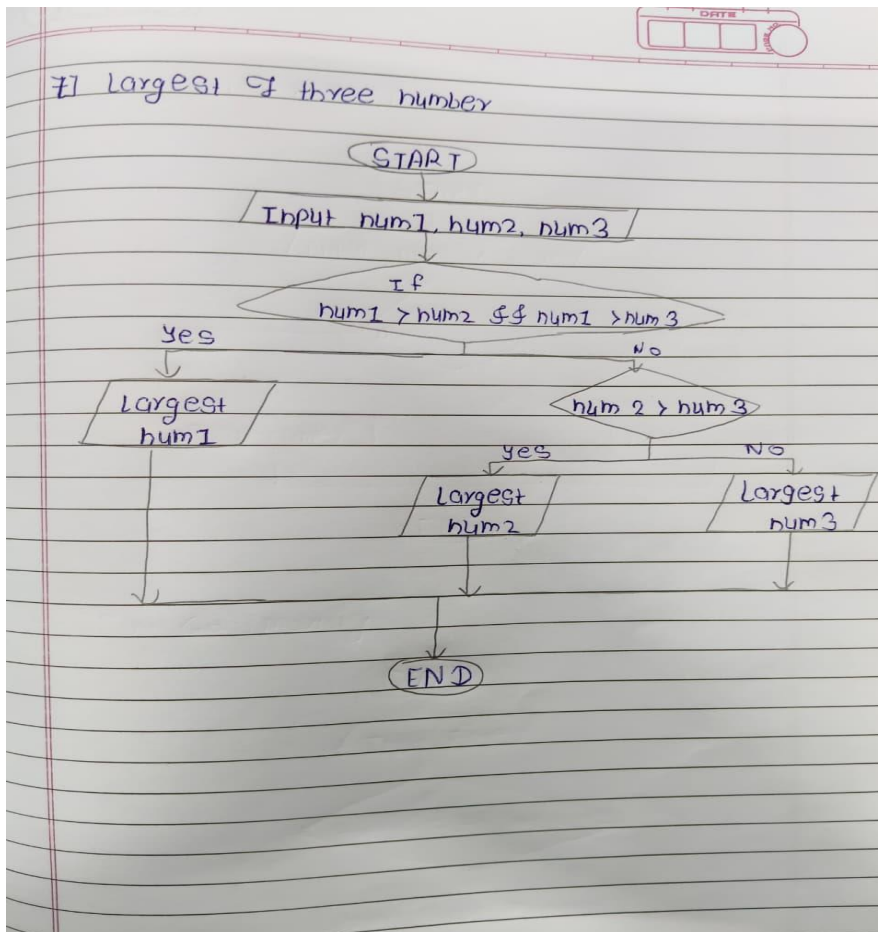

- Code: -

```
public class AreaofRectangle{  
    public static void main(String[] args){  
        int length = 10;  
        int width = 15;  
        int area = length * width;  
        System.out.println("The area of rectangle is:"+area);  
    }  
}
```

7) Largest of three numbers

- Flowchart

- Code: -

```
public class LargestofThree{
    public static void main(String[] args){
        int num1 = 13;
        int num2 = 45;
        int num3 = 36;

        if(num1 > num2 && num1 > num3){
            System.out.println("num1 "+num1+" is largest");
        }else if(num2 > num1 && num2 > num3){
            System.out.println("num2 "+num2+" is largest");
        }else{
            System.out.println("num3 "+num3+" is largest");
        }
    }
}
```
